## Changing the PERIOD of trigonometric graphs.

1. The graph below is $y=\sin (x)$ for $0 \leq x \leq 360^{\circ}$

Draw the graph of $y=\sin (2 x)$ for $\quad 0 \leq x \leq 360^{\circ}$

2. The graph below is $y=\sin (x)$ for $0 \leq x \leq 360^{\circ}$

Draw the graph of $y=\sin (4 x)$ for $\quad 0 \leq x \leq 360^{\circ}$

3. The graph below is $\boldsymbol{y}=\boldsymbol{\operatorname { c o s }}(\boldsymbol{x})$ for $\quad \mathbf{- 9 0} \leq x \leq 360^{\circ}$

Draw the graph of $y=\boldsymbol{c o s}(2 x)$ for $\quad-90 \leq x \leq 360^{\circ}$

4. Draw the graph of just 1 period of $y=\sin (20 x)$ on the axes below.

5. Draw the graph of just 1 period of $y=\sin (30 x)$ on the axes below.

6. Draw the graph of just 1 period of $\boldsymbol{y}=\boldsymbol{\operatorname { c o s }}(\mathbf{3 0 x})$ on the axes below.
