Y 12: "PIECES" OF GRAPHS.
1(a) Draw $y=x+1$ just for $x$ values
less than or equal to 2 (ie $\quad x \leq 2$ )

(b) Draw $y=5-x$ just for $x$ values $\geq 2$
and draw this on the above grid.
2.(a) On the grid below, draw part of the graph of $y=1 / 2 x-2$ for all $x$ values which are less than or equal to 4 ie $x \leq 4$

(b) Draw part of the graph $y=x-4$ just for $x \geq 4$ and draw this on the above grid.

ANSWERS
3. Draw $y=2$ for $x \leq 0$ and on the same grid draw $y=-1 / 2 x+2$ for $x \geq 0$

4. On the grid below, draw part of the graph of $y=-x$ for all $x$ values which are less than or equal to 0

(b) Also draw part of the curve $y=x$ for $x \geq 0$ on the same grid.

5(a) Draw $y=3$ just for $x$ values less than or equal to 0 (ie $\quad x \leq 0$ )

(b) Draw $y=3-x$ just for $x$ values $0<x<3$.
(c) Draw $y=x-3$ just for $x$ values $x \geq 3$.
6.(a) On the grid below, draw part of the graph of $y=4$ for all $x$ values which are less than or equal to 0 ie $\boldsymbol{x} \leq 0$

(b) Draw part of the graph $y=2$ for $x$

Values between 0 and 3 ie $0<x<3$
(c) Draw part of the graph $y=1$ for $x$ Values over 3 ie $\quad x \geq 3$
7. Draw $y=5$ for $x \leq-2$ and on the same grid draw $y=3$ for $-2<x \leq 2$ and $y=1$ for $x>2$

$\qquad$
8. On the grid below, draw part of the graph of $y=x+5$ for all $x$ values which are less than or equal to -2 ie $x \leq-2$

(b) Also draw part of the graph $y=4$ for $-2<x<2$
(c) Also draw part of the graph $y=2-x$ for $x \geq 2$
